

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

FROM POLE TO POLE. A book for young people. By Sven Hedin. xv and 407 pp. Maps, ills. Macmillan Co., New York, 1912. \$2.50. 8 x 5½. [A translation and abridgment of "Von Pol zu Pol" which was noticed in the *Bull.*, Vol. 44, 1912. June, p. 468.]

VIEWS AND REVIEWS, from the outlook of an anthropologist. By Sir Harry Johnston. 314 pp. Williams & Norgate, London, 1912. 3s. 6d. 8 x 5½. [Replete with facts of geographical interest, although no topic is treated from the geographical standpoint.]

GUIDE BOOKS

HANDBOOK FOR TRAVELLERS IN IRELAND. 8th edition, revised and edited by John Cooke. x and 604 pp. Maps, index. Edward Stanford, London, 1912. 9s. 7 x 5. [This edition is revised, among other particulars, in the light of recent archaeological investigations. Special attention devoted to the angling section. An informative guide on the new Ireland of our day.]

BERLIN AND ITS ENVIRONS. Handbook for Travellers. By Karl Baedeker. 5th edition. x and 254 pp. Maps, plans. K. Baedeker, Leipzig, 1912. Mks. 3. 6½ x 4½. [Includes in a much expanded and carefully revised form, information heretofore given in the Handbook for Northern Germany. It will help to render the traveler independent of guides. Excellent Maps and Plans.]

DAUPHINÉ. Guide rédigé par Maurice Paillon. Collection des Guides-Joanne. 588 pp. Maps, plans. Hachette et Cie, Paris, 1910. Fr. 10. 6½ x 4. [Fourth edition with maps redrawn. A number of sketch maps show the topography of the mountain sections. Information regarding slopes and their condition. Geological notes on the surface formations.]

SAVOIE. Guide revisé par Maurice Paillon. Collection des Guides-Joanne. 482 pp. Maps. Hachette et Cie, Paris, 1912. Fr. 7.50. 6½ x 4. [Informative regarding towns and holiday resorts especially with regard to the "Route des Alpes." Numerous maps.]

GUIDE AUX RUINES D'ANGKOR. Par J. Commaillie. 241 pp. Ills., plans. Hachette et Cie, Paris, 1912. 8 frs. 7½ x 4½. [Detailed descriptions of the ruins.]

NEW MAPS

EDITED BY THE ASSISTANT EDITOR

For system of listing maps see p. 75 of this volume

NORTH AMERICA

UNITED STATES-CANADA-MEXICO. Orographical Reduced Survey Map of the United States and Part of Canada. By J. G. Bartholomew, LL.D., F. R. G. S. 1:5,000,000. $58\frac{1}{2}^{\circ}$ - $24\frac{1}{2}^{\circ}$ N.; 134° - 55° W. 11 colors. With two insets: (1) [Approaches to Vancouver, B. C. 1:2,600,000. $49^{\circ}40'$ - $48^{\circ}00'$ N.; 125° - 122° W.] 3 colors. (2) [Environs of San Francisco. 1:1,200,000. $38^{\circ}15'$ - $37^{\circ}20'$ N.; $123^{\circ}00'$ - $121^{\circ}40'$ W.] 3 colors. John Bartholomew & Co. (The Edinburgh Geographical Institute), 1912. Price, dissected and mounted on cloth, 5s.

[This map will take high rank among general maps of the United States. Although on a smaller scale than the six-sheet map in Stieler's Atlas it is on the same scale as the four-sheet maps in the Atlas Universel de Géographie (Vivien de St. Martin) and Andree's Atlas which are in many respects now superior to that one-time masterpiece of Petermann. The chief value of this map, however, lies in its being a hypsometrical map. Of maps of this type it may well lay claim to being considered the best, for, of comparable maps, the relief map published by the U. S. Geological Survey is on a smaller scale, viz. 1:7,000,000, while of the standard contour map of the United States on the scale of 1:2,500,000, published by the same organization, no new edition has appeared since 1898.]

Relief is represented in nine colors ranging from olive green to dark brown through the color scale made familiar by the excellent similar publications of the Edinburgh Geographical Institute. These colors represent elevations each between the contours 0, 100, 500, 1,000, 2,000, 3,000, 4,000, 5,000, 10,000 feet; there are additional contours between 5,000 and 10,000 feet which are not brought out by colors. The contours seem in the main to be based on the
